

Eligible Professionals

Awards shall be available to individuals who are employees in facility management at a commercial or large residential building, industrial site, or other large site or campus where significant energy management actions were implemented by the individual during the award year. Typically the nominee will be directly involved in the operation of energy consuming systems or equipment.

Award Criteria

The award committee members shall review all complete award applications submitted in accordance with applicable deadlines and shall use the following criteria as guidance in selection of the final award winner(s). Although preferred, not all criteria must be met to receive the award.

Nominee shall:

- Be a direct employee of the company that owns and operates the systems or equipment that was made more energy efficient.
- Have been directly responsible for operation and oversight of the systems or equipment that was made more energy efficient.
- Have clearly demonstrated the work they were responsible for that separates their effort from the usual expectations for a similar role or position in a similar setting.
- Provide documented evidence of the energy and operating expense reduction. Energy units may include kWh, therms, Btu, Gallons of Oil, etc.
- Provide context for the significance of the savings value in comparison to total company or site expenditures on energy.
- Have demonstrated persistence and commitment to their efficiency idea or measure and seen it through to completion. If the end result was not as expected they shall have clearly documented and described what they learned from the experience and how that knowledge can be applied in subsequent projects.
- Have provided credible and reasonable independent verification of the reduced energy consumption.
- Have provided valuable input to management/engineering; showed an ability to critique, improve and communicate to ultimately arrive at a more successful project
- Have continued to remain engaged with the project and monitor its ongoing success
